## BATTERY EXPERTS FORUM ANNOUNCES DATE AND LOCATION FOR 2023

*Karlstein am Main, Germany, January 13<sup>th</sup>, 2023 – The Battery Experts Forum will take place in 2023 from 07<sup>th</sup> – 09<sup>th</sup> November at the Wissenschafts- und Kongresszentrum Darmstadt (also known as Darmstadttium).*

As part of the networking event, the Who's Who of the international battery industry will meet for the 18<sup>th</sup> time this year.

True to its motto "Charge up your knowledge", the event will focus on an exchange at the highest scientific level within the framework of the associated three-day conference. Anticipation of inspiring impulses, in the form of keynotes, tutorials and specialist presentations, will be aroused by topics such as recycling, current trends/world market, e-mobility, storage technologies and charging.

In addition, various companies along the entire value chain of a battery - from cell manufacturers to OEMs - will present themselves on the modern and attractive exhibition area of the congress center and showcase materials, components, product innovations, test procedures, recycling processes and designs.

As a must-have event for the industry, the Battery Experts Forum offers a unique combination of insider news with the highest scientific standards in the conference, latest trends in the exhibition and the chance to meet the experts of the industry up close, not only in the presentations but also during the networking events.

Shortly, the Battery Experts Forum organizing team will provide more information (call for papers as well as conditions for sponsorship, exhibition space and conference tickets) on <https://www.battery-experts-forum.com>.

Many exhibitors and conference participants from the first hour still know the Battery Experts Forum from Aschaffenburg and have accompanied its growth-related change of location to Frankfurt in 2019. The choice of location this year fell on Darmstadt, not only because of its excellent infrastructural connections and its reputation as a city of science. The conference center there also offers all the spatial requirements for the constantly growing event format. The Darmstadttium enables the perfect symbiosis between a top-class competence forum and an accompanying trade fair on representative exhibition areas with the shortest possible distances. The Battery Experts Forum is pleased to be able to remain true to its home region, despite the change of location.

# PRESS RELEASE

**About Battery Experts Forum:**

The Battery Experts Forum is one of the world's largest exhibitions around battery technology. Sponsors and exhibitors who are among the most important companies in the entire value chain of a battery are part of the international exhibition. In addition to cell and battery manufacturers, you will find suppliers of components and services as well as OEMs. Design, production and manufacturing solutions as well as complete battery systems, materials and components but also test procedures and recycling processes will be exhibited. The focus of the event is placed on the associated conference with the highest scientific standards. Here, over 100 leading users, developers and researchers from international companies and institutes, as well as opinion leaders, will speak about the latest industry trends over the three days of the event.
