

PRESS RELEASE

BATTERY EXPERTS FORUM'S CONFERENCE PROGRAMM FINALIZED

Karlstein am Main, Germany, May 11, 2022 – The Battery Experts Forum is pleased to announce the release of its three-day conference program from July 12 - 14, 2022 (Frankfurt am Main/Exhibition Center). The Battery Experts Forum will feature high-profile speakers from key players in the battery industry and will address the current challenges facing the industry.

Including speakers like Shmuel De-Leon, a globally networking battery expert from Israel, and Sven Bauer, a world-renowned pioneer in lithium-ion battery manufacturing who already believed in the great potential of electrification in the 1990s, the organizers of the world's largest battery trade fair, the Battery Experts Forum, can present a top-class league of speakers at their conference for the 17th time. Inspiring impulses, by keynotes, tutorials and technical presentations, are granted by topics such as fast charging, battery management systems, battery safety, recycling, standardization, procurement security and the world market situation. Experts from key players and consultants in the battery industry, such as Honda R&D Co. Ltd, Roland Berger, Williams Advanced Engineering, McKinsey & Company Inc, Farasis Energy Europe GmbH, Freyr, Exyte Management GmbH and Robert Bosch GmbH, as well as from institutes such as ZSW Ulm, RWTH Aachen, KIT Karlsruhe, Fraunhofer and the European Commission - Joint Research Centre, have been engaged for the presentations. The complete program can be viewed online at: <https://www.battery-experts-forum.com/index.php/en/program-en/battery-conference-program>.

While admission to the accompanying trade show is free of charge, the cost of a conference day ticket is € 695. In addition, discounted tickets for two (€ 1,195) or three days (€ 1,595) are available.

The Battery Experts Forum is the perfect networking platform for experts, strategists, R&D personnel, buyers, sales staff, trade journalists and other industry insiders in the battery technology sector. The inevitable transport and energy turnaround as part of the efforts to protect the climate are currently driving electrification forward at a rapid pace across all sectors. This even increases the huge necessity of this popular industry get-together. The speed of progress in the field of electrification makes a regular exchange at expert level indispensable for the fast growing battery world.

Further information on the Battery Experts Forum is available at <https://www.battery-experts-forum.com/index.php/en/>.

About Battery Experts Forum:

The Battery Experts Forum is one of the world's largest exhibitions around battery technology. Exhibitors, originating from the most important companies in the entire supply chain of a battery, are part of the international exhibition. From cell and battery manufacturers to OEMs and users, new design, production and manufacturing solutions including battery systems,

PRESS RELEASE

materials and components as well as testing and recycling processes will be presented. An absolute must be there for anyone involved in battery technology. The trade show is accompanied by a conference. On the three days of the event, more than 100 leading industry users, developers, opinion leaders as well as researchers from international companies and institutes will talk about the latest trends.
